

Company Profile

Concera was founded by a diverse group of engineers seeking to reduce the complexity of control and instrumentation projects by creating tools and systems to streamline the design and automation disciplines. The team behind Concera, with a combined experience of over 50 years, grew frustrated with the traditional approach to managing and executing projects. Regardless of industry, from mining to pulp-and-paper to oil-and-gas, the Concera team has the experience.

From conceptualisation to handover, Concera can provide a complete C&I scope.

The Concera Solution

- Reduce C&I costs by utilizing reusable content and tools.
- Develop solutions instead of selling hours.
- Competitive C&I costing by encapsulating the entire scope.
- In-Depth understanding of the project lifecycle and requirements.
- Effective collaboration with multi-disciplinary project teams.
- Concera provides a wide range of skills and experience.

Application Experience

- Material Tracking and Transfer
- Crushing
- Milling
- Flotation
- Underground Mining
- Pumping
- Batch Control
- Burner Management
- Compressors
- Safety Shutdown Systems
- Packaging
- Boiler Control
- Refrigeration
- Generators
- Cyclone Cluster Control
- Agriculture
- HVAC
- Industrial Truck Wash Systems
